

Coastal Communications wanted to notify you of our upcoming fiber to the home infrastructure project in your neighborhood. We are a local company based in Savannah and our priority is to ensure a positive experience during the construction project followed by superior, hands-on customer service. The project involves the installation of underground conduit and fiber to provide reliable, symmetrical bandwidth with speeds up to 2 Gigabits through the first all fiber experience at The Landings.

Over the next few weeks, you will likely encounter our construction teams. We will make every effort to minimize disruptions. Please reach out to us with any questions or concerns:

[How will construction affect my property?](#)

Coastal Communications will be installing fiber in the public right of way/easement. We are working with all utility owners to ensure that the process is safe and non-invasive. There will be disruption of grass and dirt in the easement. Our goal is for all construction areas to be restored to their original condition.

If you have signed up for service, we will be on your property at a scheduled time with a less invasive method. We will make sure you are satisfied with the condition of your property when we leave.

[There are colored flags in my yard. Can we remove these?](#)

For everyone's safety, please don't remove colored flags or markers being placed by locate crews. These flags allow our construction crews to safely locate underground utilities during the fiber installation process.

[Who is Coastal Communications, and how does this project affect me?](#)

Coastal Communications is a Savannah-based internet service provider. Our infrastructure is all brand new, 100% fiber optic, and we offer only state-of-the-art, ultra-fast internet options. All of our plans provide symmetrical bandwidth. Our network is being built to lay the groundwork for future internet of things and open access offerings that will be available as they are developed. We are making a significant investment in the technology infrastructure that will serve your neighborhood for future decades.
